

How To Edit Logo Template in Illustrator

1. Choose the logo that you want. See the “Logo Catalog” to find the logo you want. For example I choose “Minimal Logo 003”.
2. Open the folder “Minimal Logo Pack”.
3. Download and install fonts that listed in “Minimal Logo 003.txt”. (Don’t need to do this if you has been downloaded all fonts listed in “All Font Links”)
4. Open “Minimal Logo 003.ai” with illustrator.
5. Edit the text using “Type Tool” (T)
6. To change color, select the part that you want to change the color using “Selection Tool” (V). Then choose the color on the “Color Picker”
7. When you export the design, choose CMYK for print or RGB for web on the color mode.
8. Happy Design. 😊
